UNIVERSITY TEACHING

DIS Study Abroad | External Lecturer

2024–present | Stockholm, Sweden

Teach App Development to third-year U.S. computer science students studying abroad in Stockholm. Students design and build Android and iOS apps with usable interfaces. Teaching is in English.

COURSE TOPICS

- Android and iOS development with Flutter, Dart, React Native, Expo, and TypeScript.
- App architecture and usable interfaces.
- Firebase and Supabase integration.
- Testing and releases to the App Store and Google Play.

GUEST LECTURES

I give guest lectures in English. Topics include:

- Native Android and cross-platform development.
- Taking a student app to production.
- Technical leadership and teamwork.
- AI-assisted development, code review, and testing.

INDUSTRY EXPERIENCE

Principal software engineer with experience since 2011. Worked at Toptal, Truecaller, Tradera, Boxbollen, and Tobii. Consulting through Moonwise covers mobile apps, technical leadership, backend services, APIs, and releases.

EDUCATION

BSc, Information Science and Computer Engineering

Ss. Cyril and Methodius University, Skopje | 2007–2011
